SUMMARY

Motivated Full-stack Web Developer with over 2 years of experience using ReactJS to develop mobile-first applications. Effective at utilizing coding skills as well as time management, problem-solving and collaboration skills to accomplish accessible websites on time. Looking for more challenging opportunities to further develop my frontend and backend knowledge.

WORK EXPERIENCE

Web Production Artist, TVO ***June 2021 – Present***

- Created accessible Web content for online courses using HTML, CSS
- Updated existing components to address new features, styling and bug fixes.
- Collaborated with UX designers to create different styling versions of interactive learning objects with CSS, React
- Developed a desktop App that automates the execution of scripts on multiple repositories reducing the workload of repetitive tasks by 50% during time-sensitive deadlines.

Jr. IT Tech Support, FCB Toronto ***April 2019 – June 2021***

- Helped users troubleshoot computer-related issues in a high-paced marketing agency.
- Collaborated with the human resources department to ensure computer equipment was delivered to new hires promptly.
- Provided training sections to around a dozen new staff every month in company technologies.
- Documented solutions to recurrent issues.

SKILLS

- Programming Languages: HTML, CSS, JavaScript, Python
- Databases: SQL, MongoDB
- Libraries & Frameworks: Node, Express, React, Electron, Bootstrap, Materialize

EDUCATION

Certificate, Full Stack Web Development ***09/2020 – 03/2021***
University of Toronto

Project: *Reddit Analytics* | *https://reddit-analytics.onrender.com*

- Developed a React application for searching and analyzing the top 100 posts in a subreddit. The app illustrates the ideal date and time of the week to create a post in a heatmap.
- Key tools used: **React, REST API**

Project: *Google Book Search* | *https://google-books-search.onrender.com/*

- Developed a Full MERN application that allows searching and saving books with the use of Google Books API.
- Key tools used: **MongoDB, Express, React, Node, Materialize CSS**

Project: *Budget Tracker* | *https://budget-tracker-ai2h.onrender.com/*

- Developed Progressive Web Application that allows tracking of a budget with/without an internet connection by storing data on a database or locally.
- Key tools used: **MongoDB, Express, Bootstrap**
