SUMMARY

With over 3 years of experience in coding, I have specialized in various projects, focusing on building efficient applications and fixing problems. I excel in collaborating with cross-functional teams to develop innovative solutions and enhance project content. My strong problem-solving skills, effective time management, and communication abilities enable me to adapt and learn new skills efficiently. I am eager to pursue challenging opportunities to further develop my expertise in different programming areas.

WORK EXPERIENCE

Junior Software Developer, TVO ***May 2024 – Present***

- Developed an accessible interactive learning object using React and Three.js, featuring a 3D microscope model for educational use.
- Designed and implemented a 3D solar system model simulating planetary orbits, with dynamic controls for user interaction and engagement.
- Conducted data collection using Python on an Azure Function App, integrated with Power Automate Flow to automate tutor online status tracking, eliminating manual spreadsheet updates and saving time.

Web Production Artist, TVO ***June 2021 – May 2024***

- Developed accessible web content for online courses using HTML, CSS, and React, ensuring an inclusive user experience.
- Updated and maintained components, incorporating new features, styling changes, and bug fixes to improve functionality and performance.
- Collaborated with UX designers to create styling versions of interactive learning objects using CSS and React for dynamic presentations.
- Developed an Electron desktop application to automate script execution across repositories, reducing repetitive tasks by 50% and streamlining processes for time-sensitive deadlines.

Jr. IT Tech Support, FCB Toronto ***April 2019 – June 2021***

- Assisted users in resolving computer issues in a fast-paced marketing agency.
- Conducted monthly training sessions for approximately twelve new employees on company technologies.
- Documented solutions to recurring problems.

SKILLS

- **Programming Languages**: HTML, CSS, JavaScript, Python
- **Databases**: SQL, MongoDB
- **Libraries & Frameworks**: Node.js, Express, React, Three.js, Electron, Bootstrap, Materialize

EDUCATION

Certificate, Full Stack Web Development September 2020 – March 2021
University of Toronto
Project: *Reddit Analytics* | *https://reddit-analytics.onrender.com*

- Developed a React application for searching and analyzing the top 100 posts in a subreddit, presenting the ideal date and time for posting in a heatmap format.
- Key tools used: **React, REST API**

Project: *Google Book Search* | *https://google-books-search.onrender.com/*

- Built a full MERN stack application for searching and saving books using the Google Books API.
- Key tools used: **MongoDB, Express, React, Node, Materialize CSS**

Project: *Budget Tracker* | *https://budget-tracker-ai2h.onrender.com/*

- Created a Progressive Web Application (PWA) that tracks a user's budget, both online and offline, by storing data locally or in a database.
- Key tools used: **MongoDB, Express, Bootstrap**
